The PAX-Organizing System

In order to find out which inner pouch or which module like e.g. intubation XL or ampoule holder XL fit into one of our emergency backpacks or into one of the emergency bags of the „Professional line“ we have added a POS symbol (PAX-Organizing System) to these modules or inner pouches.

Front bag of the Wasserkuppe-Series suitable for module XL or for a combination of module L and e.g. ampoule holder S.

The central partitions of our Wasserkuppe backpacks can optionally be replaced by alternative solutions. Standard: Intubation

The central partition can be optionally completely removed. Instead further inner pouches can be stored.

Wasserkuppe with installed divider system

The position of optional oxygenbottle holder (0,8 L or 2 l) is up to your choice.

Bags

Our PAX-bags are real lifesavers in an emergency. Suggestions from use of our bags in practical situations allow them to be constantly optimized, so there really is a perfect bag for every occasion and every application.

PAX-bags provide you with enough space for everything you need, excellent carrying comfort and optional extras.

Even custom-made products of any type are no problem!

Ampoule holder

Administering medicines is a matter of trust. So is the preparation of medication. For this reason, PAX-ampoule holders are designed in such a way that the syringes and cannulas are to hand so that full attention is drawn to the medicines. The various sizes of ampoule holders enable them to be combined in a variety of ways with our backpacks and bags.

Ampoule modules

Personal Equipment

We at PAX appreciate the value of your work and want you to feel as safe as possible in your day-to-day challenges.

We provide you with equipment you can rely on. Tool bags in many different styles, frontpacks and vests from PAX allow you to concentrate fully on your work safely.

Personal Equipment

Personal Equipment

Pro-Series

Pro-Series holster

Our brand new holster for professional use offer comprehensive protection for the personal equipment while enabling a quick and safe access.

By means of the optional PAX-Lock belt system it can be detached from the belt with a flick of the wrist. Every Pro-Series holster can be refitted with it later.

Standard cover Pro-Series

We have invented a new concept for our holster with a cover compartment of our Pro-Series.

As standard the covers feature an insert compartment on the lower side for our practical PAX-Clip (Art.-no. 10214) and are fitted with an outer velcro compartment for small parts, e.g. injection stoppers.

Item no. 12412

PAX-Lock System

The adapter set incl magnetic lock and reinforcement plate upgrades each Pro-Series holster by a quickrelease- function.

3,15 x 2,56 x 0,01 0,07

03

PAX-Lock System

The PAX-Lock System is a universal belt holder for all PAX-Pro-Series holster. The PAX-Lock System is delivered separately from the holster and is fixed to the holster and the belt or to the duty belt in a few steps.

PAX-Lock for fixation directly to the belt

PAX-Lock for mounting directly at the holster

In the first step the stabilization plate has to be put to the rear side of the holster and if necessary, the plate has to be adjusted a little by simple scissors. The holes for the fixation screw in the stabilization plate and the holster have to lie on top of each other. After that the fixation screw is tightly screwed to the PAX-Lock counter part.

Safety hint: Screw with a drop of super-glue into the thread!

The belt adapter - delivered as a complete unit - only has to be fixed to the belt or to the duty belt. The small adapter belt straps should be tightly fixed around the duty belt.

Hint: The opening strap can also be fixed to the belt showing to the bottom. Thus an undeliberate opening is nearly avoided.

Duty belt S - XXL (with underbelt)

The duty belt can be completely equipped with (e.g.) narcotic ampoule kits and hooked onto the underbelt which is threaded through the belt loops only short before an operation. Thus the material must not necessarily be worn all the time and could be placed e.g. into the car to have it handy at any time.
